Moldex3D

PLASTIUM

Pôle d'Excellence Plasturgie et Composites

MiDAY LILLE 2023

The use of CAE 3D technology is common practice. But what good is it if you don't use it correctly or if you don't know how to interpret the results?

INTENTION

We constantly update the latest global trends and integrate creative and innovative ideas into our powerful product portfolio.

Are you interested in the broadness of knowledge, ideas and current technical developments in solutions for the plastics processing industry?

Do you have questions about the development and optimization of your parts and tools?
Sharing knowledge and experience is our most valuable asset.

At our Molding Innovation Day in Lille, we'll be happy to inform you about the potential and perspectives of future-oriented manufacturing processes.

Come and discuss with us and industry experts on how to manufacture tools faster and more efficiently or how to reduce tool production time for while increasing part quality, and more.

All those interested in the theme of "Injection Molding Technologies for the future" are invited to attend. The conference will be held in English and French.

Make your project our project.

Break your limits. Challenge us!

REGISTER NOW!
