# SimpaTec Usermeeting 2019

---

INVITATION

---

March 25 and 26, 2019, Unesco-World Heritage 'Zollverein' Essen

We are at the puls of time for you. Always.

Continuously filtering the latest, global trends and bundling creative and innovative ideas into a powerful product portfolio - is our goal. Our roots - and our path - is and remains 'simulation'.

Sharing knowledge and experience through precise communication with you, our customers, is our greatest asset.

Break your limits. Challenge us.

# INTENTION & CONCEPT

The personal contact with you plays an extremely important role for us in terms of precise, solution-focused communication. Traditionally, our annual user meetings have a high priority. The popularity and the consistently positive response from the circle of participants in recent years shows us to thoroughly and steadily expand this path. For the first time, we therefore decided, to offer our users even more content and space for information exchange and discussions by means of a new concept.

Of course, the focus of the two-day event will again be set on practice-oriented technical contributions by our users. However, the topics this time include the entire field of our CAx products. The presentations are going to be held in parallel sessions for the entire group of participants. A particular focus will continue to be set on Moldex3D, but also users of Digimat, T-SIM, B-SIM and 3D\_Evolution | 3\_Analyzer | 4D\_Additives are invited to catch up in separate topic-specific lectures, workshops and discussion rounds. Create your own conference program. The conference language is English.

Selected, well-known companies will additionally present their current industry-specific development trends, news and innovative products in our exclusive exhibitor area.

A special highlight is the evening event for our upcoming 15-year company anniversary.

Celebrate with us - also in accompany.

We look forward to you!

Practice-oriented technical contributions from the circle of users are an integral part of our usermeetings.

# CALL FOR PAPERS

Not only for you, our participants, it is interesting and exciting to see, which experiences, findings and of course suggestions for the own use of your simulation tool will be revealed to the auditorium every year.

Give us an insight into your practical experience.

Show us your application examples, case studies or let us share your view of things when performing the work. As a special thank you one day attendance will be free of charge.

As part of our International Usermeeting 2019 we gladly offer you the opportunity to be a speaker whether it being in a detailed 20-minute progress report or in the section "Short Reports".

### Please choose:

#### CAx-Tool:

- Moldex3D
- Digimat
- T-SIM
- B-SIM
- 3D\_Evolution | 3\_Analyzer | 4D\_Additive

#### Scope of presentation:

- Progress report (20 min+10 min discussion)
- Short report (5-10 min)

Title:
