

SimpaTec is one of the leading engineering and software companies for the plastics processing industry and offers expert advice and support for the holistic development and optimization of components, tools and processes. As a partner with many years of experience in injection molding simulation, we help our customers to find profitable solutions.

For the Hannover area we are looking for a:

CAE Sales Engineer (m / f / d)

(Full-time employment / specialized field engineering services)

Are you fascinated by the use of innovative CAE software products? Do you like to approach people and already have experience to market solutions requiring explanation, ideally in the plastics environment? You have a high self-motivation and great will to succeed and know how to win and look after customers by active and creative consulting? Do you have a completed education as an engineer in the field of mechanical engineering, CES, plastics technology, process engineering or materials science? You can inspire yourself and others? Then we want to meet you.

We offer you the opportunity to be part of the distribution of one of the world's leading key technologies for the optimized design of components, tools and plastics manufacturing processes. After intensive training, you independently take on a demanding and varied job with many design and development opportunities in an open and dedicated team. Your deployment location will be Hannover.

Interested? Then send your sound application documents including salary requirements and the earliest possible entry date to → jobs@simpatec.com.

Alternatively, we expect your documents by post to SimpaTec GmbH | Wurmbenden 15 | 52070 Aachen. Our Mr. Hinse will be pleased to answer your questions at +49 241 56 52 76-0
