SimpaTec Usermeeting 2020

INVITATION

March 17 and 18, 2020, Les Haras Biocluster, Strasbourg

SimpaTec - SIMULATION IMPACTS TECHNOLOGY -
is our motto, our faith and our foundation.

From the first day up to the present, and will remain in the future.

INTENTION & CONCEPT

Personal contact with precise, solution-focused communication is the key to success. Our annual users meeting serves this purpose. Enormous positive feedback on this event from our users ascertains and encourages us not only to keep on the track but also to expand the scale for new comers and fresh ideas. Therefore, this time we offer our users more content with larger space for information exchange and new concept discussions.

Of course, practical applications and advance researches are the main focus of this two-days event.

Moldex3D, SmartDO and Digimat users are invited to catch up all the topics, workshops and programs. The conference language is English and French.

Renowned companies will showcase their latest developements and innovative products in our exclusive exhibitor area.

A special highlight is the evening event for our 10th-year company anniversary.

Please come and celebrate with us.

We look forward to meeting you in Les Haras Biocluster, Strasbourg.
