- Innovations

In partnership with:

Moldex3D

MiDAY BeNeLux 2024

Over the past 10 years, we continuously challenge ourselves to bring fresh thinking and useful tools to impact the plastic industry.

Of course, it would never be achieved by us solely.
Therefore, we created this platform – **Molding Innovation Day (MID)**.

Partnering with various industrial peers and brainstorming together, we came up with lots of innovative ideas and brilliant solutions to answer the challenges customers faced, from upstream to downstream.

We are now focusing on the latest global trends on Sustainability. And we would like to invite you, as our partner, to find the best solution for our common customers.

We always believe – Together, We are Stronger.

At our **Molding Innovation Day BeNeLux 2024**, in **Sint-Michielsgestel** at **De Ruwenberg Hotel** you will showcase the latest developments, new technologies and unique knowledge to industry leaders and experts.

Let's break our limits together!

The conference will be held in English.

Seize the opportunity to showcase your company at our event in front of a gathering of high-profile professionals.

We offer exhibition spaces adjacent to the main meeting area for your representation. Additionally, on-site culinary supplies will be provided for the event.

End of registration:
May 10, 2024
